

I tested if there is a transitionend event when transitioning between property values that mean the same thing.

Code: <https://gist.github.com/surma/d01524912f3157dce9293108b60c8e96>

Live site: <http://f.surma.link/tmp/transitiontest/>

Firefox 51, Win10	transform	(translateX(0) → translate(0))	fired
	color	(rgba(255, 0, 0, 1) → hsla(0, 100%, 50%, 1))	not fired
	width	(50vw → 50%)	fired
	font-size	(19px → 1em)	not fired
	position	(static → relative)	not fired
	transform-origin	(center center → 50% 50%)	not fired
Chrome 56, MacOS 10.2	transform	(translateX(0) → translate(0))	fired
	color	(rgba(255, 0, 0, 1) → hsla(0, 100%, 50%, 1))	not fired
	width	(50vw → 50%)	fired
	font-size	(19px → 1em)	not fired
	position	(static → relative)	not fired
	transform-origin	(center center → 50% 50%)	not fired
Safari 10, MacOS 10.2	transform	(translateX(0) → translate(0))	fired
	color	(rgba(255, 0, 0, 1) → hsla(0, 100%, 50%, 1))	not fired
	width	(50vw → 50%)	fired
	font-size	(19px → 1em)	not fired
	position	(static → relative)	not fired
	transform-origin	(center center → 50% 50%)	not fired
Chrome 55, Android 7.1	transform	(translateX(0) → translate(0))	fired
	color	(rgba(255, 0, 0, 1) → hsla(0, 100%, 50%, 1))	not fired
	width	(50vw → 50%)	fired
	font-size	(19px → 1em)	not fired
	position	(static → relative)	not fired
	transform-origin	(center center → 50% 50%)	not fired
Mobile Safari, iOS 10.2 (simulated)	transform	(translateX(0) → translate(0))	fired
	color	(rgba(255, 0, 0, 1) → hsla(0, 100%, 50%, 1))	not fired
	width	(50vw → 50%)	fired
	font-size	(19px → 1em)	not fired
	position	(static → relative)	not fired
	transform-origin	(center center → 50% 50%)	not fired
